

Appl. No. 09/905,113
Amdt. Dated: August 10, 2005

REMARKS

The purpose of the present amendment is to correct a typographical error that appeared in claim 10 previously submitted. The term "secure input device" in the clause beginning assembling data at said input device has been changed to "secure module" and the phrase "secure module" has been changed to "secure output device." This is consistent with the description and it is believed that this amendment will facilitate further consideration by the Examiner.

Respectfully submitted,

John R.S. Orange
Agent for Applicant
Registration No. 29,725
